# WE CAN BRING AN AFTER SCHOOL FOREST SCHOOL CLUB TO YOUR SCHOOL GROUNDS

## WHO WE ARE?

Canopy Forest School is run by Emma Clode who is a local primary school teacher with over 20 years of teaching experience and is a qualified Level 3 Forest School leader. Emma has worked in a wide variety of schools in England, Switzerland and Norway and has a strong belief in the benefits and importance of taking teaching and learning outside. She has worked for many years as an outdoor learning coordinator within school and is skilled in developing links between outdoor learning and the curriculum. Emma runs her Forest School sessions alongside Jo Streat another experienced teacher who is also Level 3 Forest School trained and has a passion for health and wellness.

## WHAT WE DO?

We can bring an after school Forest school club to your school which will run within your school grounds. At the moment we run two very successful Forest School clubs at local Hampshire Schools which offers 12 students from a chosen year group the opportunity to benefit from an all year round Forest School experience. Our sessions run in all weathers for two hours after school and we supply all of the equipment hot and cold snacks and drink. We deal directly with parents who pay for sessions online, we write half termly reports for each child and the work we do helps to maintain and enhance your school grounds.

## OUR AFTER SCHOOL FOREST SCHOOL SESSIONS

Forest School is a unique experiential learning process which aims to build up children's skills, abilities and confidence week by week through practical hands-on activities in the outdoors. It gives them the chance to explore, learn and discover at their own pace in a safe and supportive space. Forest School uses natural resources to stimulate imagination, creativity and investigation.

## ALSO INCLUDED:

### ECOLOGICAL IMPACT REPORT

Before we set up and start running Forest School sessions at your school we will conduct a survey of your grounds and create an ecological report which is a formal system that identifies and creates an inventory of all the flora and fauna that exist in the area, the topography, substratum, site history/antiquity, site ownership, management and protection. This process evaluates the factors which will support and enhance our interactions with this space.

### SUSTAINABLE SCHOOL GROUNDS PLAN

We will also produce a sustainable School grounds plan which will outline the proposed actions for looking after area that any outdoor learning will occupy. It will also outline the impact that this learning will have on the environment.
